# Student Mock Exam History

Student: S-0042 (demo student) | Target exam: CF-101 | Scheduled exam date: 2026-11-23 | Document ID: CF101-HISTORY

This document records eight weekly full-length CF-101 mock exams (60 questions each) taken between 2026-09-07 and 2026-10-26, together with weekly study hours per domain. Domain scores are percentages of correct answers. Early mocks were taken untimed, with the timer only recorded; from mock 6 onward the student aimed to finish within the 90-minute limit. Weighted percentages and scaled scores are NOT listed here: compute them using the weights and scoring method in the CF-101 Exam Blueprint.

## Table 2.1 - Domain scores per mock exam (percent correct)

## Student notes

- Week 7 had only 7 study hours because of a university exam week; the Security & Identity score still rose from 63 to 66.
- The student reports that Security & Identity questions feel the slowest and most ambiguous.
- Weekly study availability is normally 8 to 11 hours; the target for the final three weeks is 11 hours per week.
- Goal: reach a scaled score of at least 750 on two consecutive mocks before 2026-11-23.
